

Tips:

- The dry powders may stain hair & clothes. To avoid and/or minimize stain, vigorously shake out all dry excess powder before stepping into a shower, or throwing your clothes in the wash. Once the caked dry colors get wet, it is hard to get out.
- Do not throw colors into people's eyes or mouth. It is even more fun to rub the colors, into the hair, back of the neck, and cheeks. Anyone with asthma or any other breathing issues should avoid color events, or at least wear a mask and stay well away from the center of action. Same advice if you happen to be allergic to corn starch.
- Do not wear contacts to a color event!
- Those who would rather observe than participate in the throwing of the colors may stay back and watch from a distance, but there is no guarantee.
- Do not throw colors on any passing cars, the DJ or the vendors.
- Please don't throw colors directly in someone's mouth or face.
- HAVE FUN! You're raising money and awareness for GlutIDS!
